

the Navajo Nation for the construction of a 1,500-megawatt power plant employing the most advanced clean coal technology available today. This is the Desert Rock project.

Navajo Nation President Joe Shirley said that Desert Rock would create "500 permanent jobs at union wages on a reservation with an unemployment rate hovering around 50 percent."

This is an example that every community in America should follow, but it's an example lost on the Democrat leadership of this House. I hope my friends on the other side of the aisle consider that job training makes sense only when those jobs are available.

I reserve the balance of my time.

Ms. BORDALLO. Mr. Speaker, I yield such time as he may consume to the sponsor of this bill, the gentleman from Massachusetts (Mr. LYNCH).

Mr. LYNCH. I thank the gentlelady from Guam for yielding me this time. I also would like to thank our chairman, NICK RAHALL, and Ranking Member DOC HASTINGS of the Natural Resources Committee for their cooperation in allowing this bill to move forward.

Mr. Speaker, I rise in support of H.R. 1129, legislation to authorize the Secretary of the Interior to provide annual grants for the development of regional ironworker training programs for Native Americans. Notably, an identical version of this legislation passed the House of Representatives under suspension of the rules by the 110th Congress by a vote of 302-72.

Currently, only one ironworker training program that is specifically geared towards Native Americans exists in the United States, and that is the highly successful National Ironworkers Training Program for American Indians based in Broadview, Illinois. The Broadview program has stemmed from a strong and enduring partnership between the Federal Government's Bureau of Indian Affairs and the Ironworkers International Union, one that has lasted over 35 years.

Working in conjunction with the International Association of Bridge, Structural and Ornamental Iron Workers, the Broadview center provides highly specialized training in ironworking skills and related fabricating and welding shop classes and on-the-job education to Native American Indians from across the United States.

Upon completion of the program, each student possesses essential knowledge in union structure and history, OSHA safety regulations and a variety of ironworking skills, including blueprint reading and related math, arc welding and the erection of structural steel. Broadview graduates are subsequently placed as apprentices at local ironworker unions nationwide and, as a result, are afforded the opportunity to pursue productive and high-quality construction careers.

H.R. 1129 will build upon the success of the Broadview, Illinois, program by facilitating the establishment of regional ironworker training centers for

Native Americans across the United States through the authorization of annual Interior Department grants. Mr. Speaker, the impetus behind the legislation is to provide occupational training to Native Americans residing in economically depressed communities, to accord them the opportunity to secure good jobs in the ironworking trade and ensure a solid future for themselves and their families.

H.R. 1129 also stems from and expands upon the ironworkers longstanding relationship with the Native American community. As a structural ironworker for 20 years, I have been a member of Iron Workers Local 7 for 30 years, and I am actually past president of that union. I am well aware of a longstanding contribution made by Native Americans to the ironworking industry.

As noted by the Ironworkers International Union and its president, Joe Hunt, Native Americans have been a part of ironworker history since 1886, when the St. Lawrence River was bridged on tribal land in Quebec and ironworkers' foremen first hired Native Americans as ironworkers.

In my own role here, as an ironworker apprentice, I worked under a number of Native American foremen and general foremen. It was a number of Native American journeymen ironworkers who taught me how to weld and gave me a chance at that trade. As an ironworker foreman and a general foreman myself, I had an opportunity to have a lot of young Native American Indians working in my crews, not only in the Boston area, but out in Indiana and Illinois, as well as New Mexico and Arizona.

And I have had a long relationship with members from the Navajo Tribe. I actually lived for a while on the Navajo Reservation, and I count those men and women as some of my closest friends, and I am greatly indebted to them. I also worked with members of the Apache Tribe and Mohawk Tribe in the New England area. This will really, I think, give a wonderful opportunity to Native Americans who have sort of adopted the ironworking industry as a family business. And it was not uncommon for me to be, as a Caucasian, a minority on a lot of the construction sites that I worked on in New Mexico and in other parts of the country where American Indians really provided the majority of the working members on those jobs.

Again, I would like to thank Chairman RAHALL and Ranking Member HASTINGS for their wonderful support on this legislation, also, Member DALE KILDEE, who has also put his shoulder to the wheel on this bill.

I urge my colleagues to join me in supporting H.R. 1129.

Mr. YOUNG of Alaska. I yield back the balance of my time.

Ms. BORDALLO. Mr. Speaker, I again urge Members to support this bill.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Guam (Ms. BORDALLO) that the House suspend the rules and pass the bill, H.R. 1129.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. FOXX. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

TULE RIVER TRIBE WATER DEVELOPMENT ACT

Ms. BORDALLO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1945) to require the Secretary of the Interior to conduct a study on the feasibility and suitability of constructing a storage reservoir, outlet works, and a delivery system for the Tule River Indian Tribe of the Tule River Reservation in the State of California to provide a water supply for domestic, municipal, industrial, and agricultural purposes, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1945

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tule River Tribe Water Development Act".

SEC. 2. WATER SUPPLY FOR TRIBE.

(a) DEFINITIONS.—In this section:

(1) SECRETARY.—The term "Secretary" means the Secretary of the Interior, acting through the Commissioner of Reclamation.

(2) TRIBE.—The term "Tribe" means the Tule River Indian Tribe of the Tule River Reservation in the State of California.

(b) STUDY AND REPORT ON ALTERNATIVES.—

(1) STUDY.—Not later than 2 years after the date on which funds are made available under paragraph (3), the Secretary shall complete a feasibility study to evaluate alternatives (including alternatives for phase I reservoir storage of a quantity of water of not more than 5,000 acre-feet) for the provision of a domestic, commercial, municipal, industrial, and irrigation water supply for the Tribe.

(2) REPORT.—On completion of the study under subsection (a), the Secretary shall submit to the Committee on Natural Resources of the House of Representatives and the Committees on Energy and Natural Resources and Indian Affairs of the Senate a report describing the results of the study.

(3) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary \$3,000,000 to carry out this subsection.

(c) CONDITIONS FOR FUTURE PROJECTS.—

(1) IN GENERAL.—No project constructed relating to the feasibility study under subsection (b) shall provide any water supply for—

(A) the casino of the Tule River Tribe, as in existence on the date of enactment of this Act;

(B) any expansion of that casino;
 (C) any other tribal casino; or
 (D) any current or future lodging, dining, entertainment, meeting space, parking, or other similar facility in support of a gaming activity.

(2) AVAILABILITY OF WATER SUPPLIES.—A water supply provided by a project constructed relating to the feasibility study under subsection (b) shall be available to serve—

(A) the domestic, municipal, and governmental (including firefighting) needs of the Tribe and members of the Tribe; and

(B) other commercial, agricultural, and industrial needs not related to a gaming activity.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Guam (Ms. BORDALLO) and the gentleman from Alaska (Mr. YOUNG) each will control 20 minutes.

The Chair recognizes the gentlewoman from Guam.

GENERAL LEAVE

Ms. BORDALLO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Guam?

There was no objection.

Ms. BORDALLO. Mr. Speaker, the Tule River Water Development Act, sponsored by our colleague from California, Representative DEVIN NUNES, would authorize the Secretary of the Interior, acting through the Bureau of Reclamation, to complete a feasibility study that would evaluate alternatives for a water supply for the Tule River Tribe of the Tule River Tribal Reservation.

The tribe views this study as a very important first step in settling their water right claims. Similar legislation passed the House in the last Congress, and I urge my colleagues to support the passage of H.R. 1945 today.

I reserve the balance of my time.

Mr. YOUNG of Alaska. Mr. Speaker, I yield myself as much time as I may consume.

This important legislation, introduced by our California colleagues, DEVIN NUNES and JIM COSTA, is the first step towards improving the water supply situation on the Tule River Indian Reservation. This bill authorizes the Bureau of Reclamation to conduct a feasibility study to capture more surface water on the reservation.

Many areas throughout the West, including California, need new water storage to help meet water supply needs for humans, fish and wildlife. This legislation will help the tribe move one step closer to utilizing its water rights. This legislation enjoys universal support from the tribe and nearby communities and is an excellent example of where neighbors have come together for the common good.

I urge my colleagues to support this very bipartisan piece of legislation.

I yield back the balance of my time.

Ms. BORDALLO. Mr. Speaker, I again urge Members to support this bill. I have no further speakers.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Guam (Ms. BORDALLO) that the House suspend the rules and pass the bill, H.R. 1945.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. FOXX. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

SUPPORTING NATIONAL MEN'S HEALTH WEEK

Mr. LYNCH. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 142) supporting National Men's Health Week.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 142

Whereas despite the advances in medical technology and research, men continue to live an average of almost 6 fewer years than women and African-American men have the lowest life expectancy;

Whereas 9 of the 10 leading causes of death, as defined by the Centers for Disease Control and Prevention, affect men at a higher percentage than women;

Whereas between the ages of 45 and 54, men are 3 times more likely than women to die of heart attacks;

Whereas men die of heart disease at almost twice the rate of women;

Whereas men die of cancer at almost one and a half times the rate of women;

Whereas testicular cancer is one of the most common cancers in men between the ages of 15 and 34, and when detected early, has a 95 percent survival rate;

Whereas the number of cases of colon cancer among men was almost 54,000 in 2008, and almost half of such men died from the disease;

Whereas the likelihood that a man will develop prostate cancer is 1 in 6;

Whereas the number of men contracting prostate cancer reached over 186,000 in 2008, and almost 29,000 of such men died from the disease;

Whereas African-American men in the United States have the highest incidence in the world of prostate cancer;

Whereas significant numbers of male-related health problems, such as prostate cancer, testicular cancer, infertility, and colon cancer, could be detected and treated if men's awareness of these problems was more pervasive;

Whereas more than one-half the elderly widows now living in poverty were not poor before the death of their husbands, and by age 100 women outnumber men 8 to 1;

Whereas educating both the public and health care providers about the importance

of early detection of male health problems will result in reducing rates of mortality for these diseases;

Whereas appropriate use of tests such as Prostate Specific Antigen (PSA) exams, blood pressure screens, and cholesterol screens, in conjunction with clinical examination and self-testing for problems such as testicular cancer, can result in the detection of many of these problems in their early stages and increases in the survival rates to nearly 100 percent;

Whereas women are 100 percent more likely to visit the doctor for annual examinations and preventive services than men;

Whereas men are less likely than women to visit their health center or physician for regular screening examinations of male-related problems for a variety of reasons, including fear, lack of health insurance, lack of information, and cost factors;

Whereas National Men's Health Week was established by Congress and first celebrated in 1994 and urged men and their families to engage in appropriate health behaviors, and the resulting increased awareness has improved health-related education and helped prevent illness;

Whereas the Governors of over 45 States issue proclamations annually declaring Men's Health Week in their States;

Whereas since 1994, National Men's Health Week has been celebrated each June by dozens of States, cities, localities, public health departments, health care entities, churches, and community organizations throughout the Nation, that promote health awareness events focused on men and family;

Whereas the National Men's Health Week website has been established at www.menshealthweek.org and features Governors' proclamations and National Men's Health Week events;

Whereas men who are educated about the value that preventive health can play in prolonging their lifespan and their role as productive family members will be more likely to participate in health screenings;

Whereas men and their families are encouraged to increase their awareness of the importance of a healthy lifestyle, regular exercise, and medical checkups; and

Whereas June 15 through 21, 2009, is National Men's Health Week, which has the purpose of heightening the awareness of preventable health problems and encouraging early detection and treatment of disease among men and boys: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring). That Congress—

(1) supports the annual National Men's Health Week; and

(2) requests that the President of the United States issue a proclamation calling upon the people of the United States and interested groups to observe National Men's Health Week with appropriate ceremonies and activities.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Massachusetts (Mr. LYNCH) and the gentleman from Mississippi (Mr. HARP-ER) each will control 20 minutes.

The Chair recognizes the gentleman from Massachusetts.

GENERAL LEAVE

Mr. LYNCH. Mr. Speaker, I ask that all Members may have 5 legislative days within which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.
